Mélanie Roy

MBA, MPM, Occupational Therapist

This presentation will have a particular focus on the different challenges that people with Alzheimer's disease or other dementias may face when performing everyday tasks. Whether personal care, housework, or self-management activities (medication, finances, appointments, etc.), it can be difficult to accept that previously simple tasks have become difficult. Participants will receive tips and practical tools to help them safely accomplish these tasks, as well as strategies to preserve their independence for as long as possible.
